7A Type A Steel Drum

Drums have been tested per 7A Type A, 1, 2 and 3 regulations and are intended for use as shipping and storage containers for permissible radioactive materials.

- Made from carbon steel
- 10, 16, 30, 55 and 85 gallon capacities
- Compliant with DOE regulations
- UN Performance Rated

RoundTrip™ Collection: Have empty drums you want picked up? Call us at 1 (800) 406-9377

55 gallon (208 L) steel drum with a “W” swedge configuration that is available as an open-head or tight-head. It is specifically designed to optimize transportation for drums being shipped overseas.

- Fits 4 abreast in overseas shipping containers
- UN Performance Rated
- Meets ISO & ANSI MH2a-1998
- Improved vacuum/pressure performance
- Safer transport with “w” swedge configuration
- Reduces freight cost by 11%
